ISL Stock Rating System: ISL employs a 3-tier rating mechanism i.e 'BUY', 'HOLD' and 'SELL', which is based upon the level of expected annualized return for a specific stock. When total annualized return (capital gain + dividends) exceeds 18.5%, a 'BUY' rating is assigned. A 'SELL' rating is issued whenever total annualized return is less than negative 5% and for return in between the 2 ranges, 'HOLD' rating is meted out. An 'Under Review' stance is given if ISL research stance depends upon the outcome of an uncertain event having significant impact on the valuations. Different securities firms use a variety of rating terms/systems to describe their recommendations. Similar rating terms used by other securities companies may not be equivalent to ISL rating system.

Time horizon is usually the annual financial reporting period of the company (unless otherwise mentioned in the report). Ratings are updated daily and can therefore change daily. They can change because of a move in the stock's price, a change in the analyst's estimate of the stock's fair value, a change in the analyst's assessment of a company's business risk, or a combination of any of these factors. In addition, research reports contain information carrying the analyst's views and investors should carefully read the entire research report and not infer its contents from the rating ascribed by the analyst. In any case, ratings or research should not be used or relied upon as investment advice. An investor's decision to buy, sell or hold a stock should depend on individual circumstances (such as the investors existing holdings or investment objectives) and other considerations.
